1A- General information

The Transmitter Solutions - Monarch transmitter is a key chain style mini transmitter operating at 433,92 MHz. It has been designed for the control of automatic closing systems and anti-burglar systems, thanks to its very high security coding system (KeeLoq® Hopping code). The code sent by the transmitter changes at each activation, avoiding any scanning and copying risk. A special algorithm allows to keep synchronized transmitter and receiver.

2 - NUMBERING

Each transmitter is manufactured and sold with a different factory-set serial number .

3 - PROGRAMMING

The transmitter must be programmed into your system memory.
Your own installer or reseller will provide you the necessary instructions for your system.

4 - OPERATION

A- Firmly depress the button until the small red LED illuminates.
B- After the LED has illuminated, release the button.
If the device you are attempting to activate does not respond, repeat steps A and B or consult section 6 (Troubleshooting) of this manual.

5 - BATTERY ACCESS

To access the battery open the case with a screwdriver acting on the slot between the cover and the bottom and remove the bottom, as shown in fig. 3a and 3b. Slide out the old batteries and replace them with the new ones [CR2016] respecting the polarity, with the positive (+) side upward.

NOTE: Please dispose of the batteries properly according to local laws and regulations.

Test proper battery installation by verifying that the red LED illuminates when the button is pushed.

The range Transmitter can operate with many receivers of the range Transmitter Solutions - 433R. Ask your installer or reseller the product which best fits your application. The output of the receivers can be either wiegand 26 bit (to communicate with access control systems) or 1-2-4 relay with NO - NO/NC output. The CR 2016 lithium batteries of the transmitter have a shelf life of about 6 months. The product fully complies with Part 15 of FCC Regulations and the European Directives 99/05/CEB9/336/CEE73/23/CEE

1B - Technical specifications

Operating frequency	433,92 MHz
Number of keys:	1
Battery :	2 x 3V lithium batteries CR2016
Battery life:	18 ÷ 24 months
Security code:	Keeloq® Hopping code
Number combinations :	2exp64
Operating temperature:	-20°F÷+131°F (-20°C÷+55°C)
Overall dimensions:	2.4"x1.4"x0.51" (61x36x13 mm)
Weight:	0.49 oz. (14 g)
